EBC Mobile device "VULKAN 10"

EBC Mobile device "VULKAN 10" is very efficient tool of help to military and police units in their actions and operations on land, on water and under water.

EBC Mobile device "VULKAN 10", because of its efficiency and wide scope of implementation on land and under sea, can contribute to various military and police units, in performing of their everyday tasks, and also in possible war operations and in various anti-terrorist actions and operations. This is especially true for special units (commando and anti-terrorist), engineer units and armoured brigades, as well as the infantry units.

Mobile teams are able, when using this device, to act quietly and very efficiently in enemy rear by performing commando and saboteur actions.

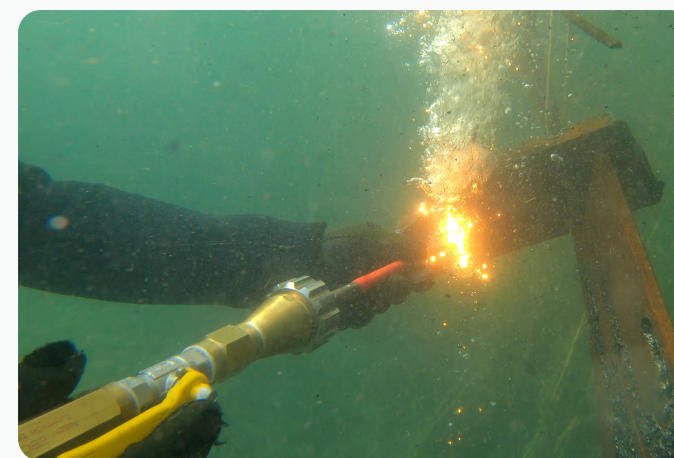

Very quick and efficient overcoming of metal obstacles of all types and sizes is possible, in every place and in all types of conditions. RAILWAYS, BRIDGES, POWER LINES, RAZOR WIRE.

As the safety equipment, together with standard firefighter and rescue equipment, this device is necessary on military ships, military transport vehicles, barracks and storages.

Technical characteristics

- EBC device "VULKAN 10" is very light, mobile, designed to be carried on the back of the user and simple for handling, and it could be carried fast and easily to all locations. This is especially practical for the work on barely accessible places and terrains (it is carried and used as hand-held device) Its efficiency is equal on the land and under water, and it was tested in various work conditions. EBC device develops temperature of over 6.000 °C on the tip of tubular electrode, which enables it to cut and drill on the land and under the water, in quick and efficient manner, all types of metal, regardless of its hardness and size, and the rust, dust, water of mud does not decrease its performance.
- Maintenance and use of EBC device "VULKAN 10" is very simple.
- Durability and endurance was tested in hardest work conditions and in all weathers.

Proven in war conditions in Ukraine

In performing military actions and operations and in protection and rescue of people and equipment, nothing should stop us.

EBC Mobile device "VULKAN 10" is a necessary help where quick and efficient action is required, and where all types of obstacles need to be overcome and removed quietly.

**TO BREAK THROUGH AND
TO EXECUTE THE TASK!**
